Soft skills are those personal values and interpersonal skills that determine a person's ability to work in a collaborative environment. Skill development must be carried out as they are vital to one's professional life and help individuals to excel in the workplace. However, they are not just career skills but are also needed to deal with the external world and to work cohesively with one's associates. While communication skills are amongst the most common, time management, adaptability, creativity, leadership and teamwork are also the essential ones.

GLA University is providing the platform to advance their skills with the help of skill development courses introduced in different programme. Apart from class room teaching every department organises different club activities to improve the ability between the students.
