### **Regular activities of IQAC**

#### **Quality of the pedagogy:**

- A dedicated team led by IQAC regularly monitors the teaching-learning process in every course to assure standard quality of teaching and coverage of syllabus.
- The team prepares a report detailing the methods and teaching tools used by each individual teacher.

- In each semester, a team of experts meet students, collect individual feedback; the analysis of the feedback with details of deficiencies is sent to the Dean Academics, the concerned HoD and teacher to maintain standards.

#### **Quality of the curriculum:**

- IQAC, collects feedback not only from the students but also from the stakeholders, especially employers and industrialists to identify the gaps related to knowledge, attitudes and skill set.
- The team regularly compares and contrasts the curriculum of other top-ranking institutions in India and abroad, and gives suggestions to the BoS members, so that the university doesn't lag behind in the global race of delivering quality education.
- In annual Academic and Administrative Audits, experts review all courses running in the university and make recommendations which are strictly followed in the next session.

#### **Quality of the evaluation:**

- It is because of the IQAC team that the whole process of examination and evaluation in the university is 100% transparent.
- As per the instructions of the IQAC team, every department constructs a committee of expert and experienced faculty members to maintain high standards during question paper formulation and fair evaluation.
- Through the dedicated online portals of the university students can see the whole process of evaluation of both theory and laboratory subjects.
- Each student can see their answer script after it is evaluated and raise complaints if she/he is not satisfied with the marks. The examination cell assures strict adherence of deadlines in all kinds of activities like, question paper submission, answer script evaluation, tabulation, query resolution and result publication.

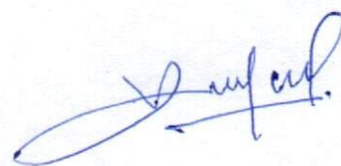

**Quality of the research and publication:**

- The IQAC team has made the criterion of high quality research and publication essential for the promotion and growth of each and every faculty member in the university.
- Work load is distributed among the faculty members in such a way that they don't get detached from studies and research.
- Through various internal and external FDPs, workshops, seminars and conferences the IQAC team not only discourages paid publication and encourages the faculty members to publish in reputed journals like Springer and Elsevier, but they are also trained how to write high quality research papers. In addition to that, well-published faculty members are awarded with monetary incentives and relief from administrative responsibilities.

**Quality of the infrastructure:**

- The IQAC team is very much concerned about keeping the GLA U family in a healthy and safe environment. For that they regularly conduct internal and external audits of the infrastructure and environment to ensure high quality of living.
- Taking suggestions from the Energy audits and Green audits the IQAC team has made clean air and water easily available to every member of the university.
- Keeping proper ventilation and natural light in mind, the classrooms, hostels and other spaces have been constructed.
- Through the online portal any complaint regarding the infrastructure is resolved regularly. Under the guidance of the IQAC, the maintenance team of the university makes sure that 99% of the university infrastructure is functional at any given moment.
